Feminist movements and ideologies

There is no guarantee arguably there are few good reasons to believe that democratized or standpoint-based science leads to more reliable theories, or better decisions for society as a whole.

Scientific Objectivity (Stanford Encyclopedia of Philosophy)

Narcissism: Denial of the True Self. Vulnerable narcissism characterized by hypersensitivity, defensiveness, and withdrawal and is strongly associated with , which is characterized by the fear of abandonment, interpersonal and affective instability, impulsivity, chronic feelings of emptiness, suicidal ideation, and self-mutilation.

History

Many post-structural feminists maintain that difference is one of the most powerful tools that women possess in their struggle with patriarchal domination, and that to equate the feminist movement only with equality is to deny women a plethora of options because equality is still defined from the masculine or patriarchal perspective. Moreover, the measurement and quantification of characteristics of scientific interest is only half of the story. Students will design projects for public education.
