**M2491: Sudbury geological compilation, Sudbury District, Sudbury Regional Municipality**

Series: 2000 Series Map Scale: 1 : 50 000 Type: Colour Map Publication Year: 1984 Publication Geographic Area: Township or Area: Awrey, Aylmer, Balfour, Blezard, Howell, Broder, Capreol, Cartier, Cascaden, Cleland, Creighton-davies, Creighton, Denison, Dill, Dowling, Drury, Dryden, Ermatinger, Fairbank, Falconbridge, Foy, Garson, Graham, Hammer, Harty, Hart, Hawley, Hess, Hutton, Hyman, I.

**Chalcophile and platinum**

CAMH Hamilton Urban Core Community Health Centre Humber River Hospital Sudbury, ON 153.

**Regional Municipality of Sudbury**

Scanning electron microscope electron backscatter images of sperrylite grains recovered from till sample 06-MPB-026, 50 m down-ice south of mineralization showing the variable size and shape of the grains: A—F anhedral angular fragments of broken grains up to 100 µm in diameter, G and H smaller, euhedral sperrylite crystals.

**Onaping Falls**

Recent experimental work revealed that there is a significant pressure effect on the incorporation of titanium into quartz, and thus a new equation was suggested, which takes this effect into consideration. These up to 3-cm patches replace the quartz-feldspar groundmass of footwall granophyre. The silicate-sulfide textures in IQD range from disseminations and blebs of sulfide in a QD matrix to disseminations and blebs of QD in a sulfide matrix.

**Onaping River**

All samples in this study were examined in transmitted and reflected light to derive textural and mineralogical information relevant to their petrogenesis. However, they may also reflect different cooling rates e. It turns east, takes in the left tributary Depot Creek, passes into the northwest corner of geographic Levack Township, Greater Sudbury, flows.

### **Regional Municipality of Sudbury**

Iona Station Village, Fingal Village.
