## Women and Work

Opting out and opting in: understanding the complexities of women's career transitions. The role of men was to support the family financially.

## Tips on How to Develop Effective Work Relationships

If you regularly carry out these seven actions, you will play well with others and build effective interpersonal work relationships.

## Work

While research has shown that women cultivate more than half the world's food — in sub-Saharan Africa and the Caribbean, women are responsible for up to 80% of food production — most such work is family subsistence labor, and often the family property is legally owned by the men in the family.

## The Work at Home Woman

Due to the multiplier effect, even if some women were not blessed with access to the pill or electrification, many followed by the example of the other women entering the work force for those reasons. Women also had high labor market participation during World War II as so many male soldiers were away, women had to take up jobs to support their family and keep their local economy on track. The system is the source of most problems.

## 9to5

I have lots of to help you be more successful and happier with your choice.

## Supporting Nursing Moms at Work

An averaging of statistics gathered by the United Nations for 2004 through 2007 reflects these differences totals may not add up to 100% due to rounding : Sectoral distribution of employed persons, by sector and sex 2004 through 2007 More detailed statistics show large differences even

within these regions. No matter your education, your experience, your personality, or your title, if you can't play well with others, you will never accomplish.

## **9to5**

Cut or delegate activities you don't enjoy or can't handle — or share your concerns and possible solutions with your employer or others. It would help if you also were a fast learner since they teach you a lot of information quickly.
