Out of these, DDC and LCC are the classification systems which are most commonly used in libraries.

### DNB

In the mid-1800s, , an Italian publisher, developed a card system for booksellers in which cards represented authors, titles and subjects. Enter a patron's bar code number just once, and then check out one or many items to that patron as required.

### LibraryWorld

Uniformity spread from library to library.

### Catalogue of the Armenian manuscripts in the Bodleian Library : Bodleian Library : Free Download, Borrow, and Streaming : Internet Archive

RDA is a package of data elements, guidelines, and instructions for creating library and cultural heritage resource metadata that are well-formed according to international models for user-focused linked data applications. The revisions and updates of the standard are referred to as AACR2. In November 1789, during the , the process of collecting all books from religious houses was initiated.
