Others are selling very well at outdoor shows. These approaches tend to identify distinct schools of thought.

## Art world

Why have so many organizations let multi-decade career models fade away? While the core need for technical skills remains strong, another theme has entered the job market: the need for people with skills in communication, interpretation, design, and synthetic thinking. The old economy had the organizational hierarchy where in top management gave out instructions which were executed by the middle manager over the workers. I also have a pretty good list of artists who have exhibited in the library over the years.

In most of these group practices, the authenticity associated with fine art is maintained by the artist either doing the essential work, closely supervising others, and giving final approval to the finished piece by signing it.

AND thank you again for all your great articles. One group of works was sold through the art organization I am a member of and they organize the shows on a regular basis. I remember all too well the early days of the spreadsheet Multiplan, then Lotus 1-2-3, then Excel and the fears that these tools would make financial analysts obsolete.

## Just How Big is the Gender Gap in Fine Art?

One study found that workers who entered the labor force in the 1980s and 1990s were more than twice as likely to stay in low-wage, dead-end jobs over the next decade compared with similar employees who joined the workforce in the late 1960s and early 1970s at the high point of the

corporate economy. Ford famously said that customers could own a car in any colour as long as it was black. The jobs of the future, driven by the increasing use of technology taking over rote tasks, require social skills complementing more technical abilities.

I decided to move to a smaller, faster-growing company. Along the way, our outcomes do not meet our expectations.

Find an interesting or catchy name for your group - the Left Bank Artists are so called because their first show was in one of two adjacent bank buildings in downtown Peterborough. I get a fair number of emails from artists asking me how they can get their work into galleries, and they don't mean just any gallery, they mean the ones who advertise in art collector magazines. In design, failure has an infinite number of causes, just like everything else.
