## Saint Lawrence River

This exhibit brought much needed recognition to the Geological Survey of Canada and personal honour to Logan. No photo available but Google has an indistinct. The coldest temperature was recorded at , which was the primary weather station for the area until records began at in September 1944.

## Saint

The City of Sept-Îles was incorporated in 1951, on the 300th anniversary of the first mass held in the village. The rest of this enormous province is little visited by outsiders. No reservations, pay at door.

## Access to the region

The St Lawrence River was the lifeline of the wilderness beyond Tadoussac until the 1960s, when Highway 138 was constructed along the Cote Nord to.

## Tonnerre River (Minganie)
