Land administration in Malaysia

The socioeconomic and physical perspective of the country within which implications of day to day decision can be considered; 11 Sheridan, LA.

Working Group 2: Cadastre and Land Management

To identify the technical and procedural issues that hampers efficient service delivery and propose simplification towards creating a user friendly system. The current functions of the Federal and State Authorities have been analysed in order to identify the changes that are necessary to be undertaken to transform both positions from a passive role to proactive to be an impetus for the improvement and enhancement of land administration in Malaysia to meet the global challenges. As land is a State matter it can be expected that each State will want to decide on what it can do with its land first rather than be subjected to a national policy.

Malaysia

There are currently 23 institutions in Malaysia that are involved in the issue of right, responsibility and restriction in the marine area.

Malaysia

Corruption is one common factor in governance problems. The title is conclusive proof that the person mentioned therein is the owner of the land described therein.

In addition to the legal regulatory framework created by the National Land Code, the land administration governance practices and values have also evolved to meet the changing needs of the rapidly developing Malaysian society. It is proposed for the DGLM leadership to be appointed from an experienced member of the government or corporate sector who has established track record in managing business sectors and making administrative reforms.

Developing Malaysian 3D Cadastre System—preliminary findings

The Parliament consists of a partially appointed senate and a house of representatives whose members are elected by universal adult suffrage. While it is not a legal requirement in the case of topographical and engineering surveys as yet, registration with the LJT is insisted upon by most clients and all government agencies. Government surveyors, as long as they are employees of the Government, are not issued with licenses, but they can perform cadastral survey work required by the Government under the overall supervision of the Director General of Survey and Mapping.

Land administration in Malaysia

Indeed, policy analysts have noted that the policy so formulated is merely directory in its affirmative aspects in so far as no method is known by which the legislative bodies of the State Government could be required to enact specific legislative measures. Land governance is an important aspect of a governmental obligation as land is the most important resource of any nation. These can improve the delivery system as well as reduce costs and expenses and promote efficient growth in property transaction within the country.

Malaysia

State Directors has the discretion to withhold information or refuse to cooperate with the DGLM. Malaysia lies close to the equator between latitudes 1° and 7° North and Longitudes 100° and 119° East. Many countries have formulated land policies, some incorporate policies into statutes, statements and guidelines for implementation.
