Architectural Acoustics

Diffusion Sound diffusion is one of the most important parts of creating a good listening experience. Health Technical Memorandum 08-01: Acoustics HTM-08-01 outlines minimum recommended criteria for acoustics in the design and management of new healthcare developments.

Architecutral & Acoustic Solutions

AF Acoustics can undertake a to identify acoustic issues within an office and offer advice on choosing effective floor and wall partitions between office space to ensure the privacy of the users.

Books — Michael Ermann

The book begins with a brief but useful history of architecture and the role of acoustics, as well as overview of human perception of, sound, and then progresses through topics ranging from acoustic measurement, noise metrics and environmental noise, to sound in enclosed spaces, sound transmission in buildings, vibration and vibration isolation, and noise in mechanical systems. We can give advice on the specification sound insulation performance of the building envelope to achieve suitable internal ambient noise levels, party wall and floor constructions and treatments to achieve desired reverberation time targets.

Architectural Acoustics

- . Specify the maximum decibel levels for building systems in design documents.
