Training Resources Group, Inc

Training and development has three main aspects which are similar but distinct. For this reason, it is important for the company to not only invest in the training of employees, but also in effective retention practices to prevent employees from taking their increased value to the open market to shop for better compensation and opportunities elsewhere. While our official anniversary date is in April.. .this year COVID-19 put a big damper on our 45th Anniversary announcement and celebration, and halted our annual day-long Staff Engagement Day, as well.

Training Resources

Training and development of staff is a vital part of a talent management strategy of reducing turnover and increasing retention rates within a company. Education is focused on jobs that the employee could possibly hold in the future and can be evaluated against those jobs. Leadership resources: find ways to develop the executive bench strength of your organization, read about current management techniques, and search for open executive and management roles.

Business Center Training & Resources

Employers value progression, and in general reward employees that attempt to constantly progress their skills and knowledge-base. In addition, the course distinguishes between the different types of Creative Commons licenses and provides a module on accessibility. Connect with recruiters that specialize in senior leadership opportunities.

Talent development is often used to describe the grooming of upper management positions, while career development is generally considered an

important program for the retention of any employee in the company, regardless of their level. If the company employs human resources management software HRMS , the capability of a learning management system, or LMS, can help from both the standpoint of employee access to ongoing training and tracking of the training by the HR department. It has also forced us to reinvent how we continue to communicate and carry on our mission to help those who are most in need.

Training Resources

Get resources and research for the HR department as well as management level professionals. The module also covers basic principles of OERs as well as information on copyright, open licensing, and publishing .

Training Resources

From the standpoint of the employee, continuing training and development provides both a greater sense of self-worth and an increase in their value to the company and to the job marketplace. Training is focused on and evaluated against the job that the employee currently holds. Development is focused on activities which may take place in the future and the employee's potential for these activities, and is difficult or impossible to quantify.
