## Federal :: Endangered and Threatened Species; Identification of 14 Distinct Population Segments of the Humpback Whale (Megaptera novaeangliae)

. Based on our consultation record on such projects in Southeast Alaska, we do not anticipate that the additional consideration of impacts to critical habitat would affect the outcome of consultations on these projects, and thus the potential for delays of these projects that would occur due to the critical habitat is low. The Restoring Education and Learning Act REAL.

## Federal :: Endangered and Threatened Wildlife and Plants: Designating Critical Habitat for the Central America, Mexico, and Western North Pacific Distinct Population Segments of Humpback Whales

Given the nature of these activities and the limited harvest, we do not anticipate any additional management measures would likely be required for these activities as a result of the critical habitat designations.

## Federal :: Endangered and Threatened Species; Identification of 14 Distinct Population Segments of the Humpback Whale (Megaptera novaeangliae)

Response: In response to public comments received and communications with the State of Alaska, Section 2.

### Detailed Methods

. If, as we suspect, the program is successful, LEAD should be expanded to other neighborhoods and other communities throughout the state. It is worth noting that after hearing a presentation on LEAD, police chiefs on neighbor islands expressed an interest in establishing LEAD on their islands.

#### **Holdings: In**

As discussed above, identification of the Western North Pacific, Hawaii, Mexico, and Central America populations as DPSs is supported by the best available scientific and commercial information. The different designations are a reflection of the best scientific data available regarding each species and their habitats rather than an indication that the humpback whale designations do not adhere to the statutory requirements for designation of critical habitat. We conclude that our modification of the BRT's approach for humpback whales in the North Pacific i.

A universal genetic testing initiative for patients with high-grade, non-mucinous epithelial ovarian cancer and the implications for cancer treatment. Response: NMFS appreciates this comment and has updated Chapter 5 of the FEA accordingly. And the trend of the Oceania DPS is unknown.

#### **Assessing Age**

Expand community-based treatment programs as an alternative to incarceration.

. The ESA does not require that we identify with specificity the exact locations within each unit where the feature occurs. For example, critical habitat provides notice to other Federal agencies of areas and features important to species conservation; provides information about the types of activities that may reduce the conservation value of the habitat; and may stimulate research, voluntary conservation actions, and outreach and education activities.
