Guns, Germs, & Steel

The way I see it, the story of man and the story of all things, for that matter is the story of varied states of disequilibrium moving violently and inexorably toward equilibrium. If prompted, choose Run or Save, then follow the rest of the prompts to complete the update.

Guns, Germs, and Steel

A similar dynamic happens here, where the reader suddenly sees commonplaces in a new light.

'Guns, Germs and Steel': Jared Diamond on Geography as Power

North America is a big fertile continent, with the result that it supports the richest and most productive nation today. In certain parts of the world, humans began pursuing agriculture because the fertile soil and temperate climate made agriculture a good use of time and resources. I say the answer is location, location, location.

Book Review: Guns, Germs, and Steel: The Fates of Human Societies

The cases are real and many of the patents are real.

Indigo

It wasn't racial characteristics that tipped the scales of fortune for the Europeans; it was their geography.

Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth Club of California's Gold Medal He never said it was geographically disposed towards poverty and backwardness, just that the geography inhibits the spread of

domesticated crops that He never said it was geographically disposed towards poverty and backwardness, just that the geography inhibits the spread of domesticated crops that are vital for agriculture and contained much less domestic-able animals than Eurasia, thereby severely limiting the speed of its development. Suggested Response: Safety and effectiveness. In Europe, Columbus was turned down by four different kingdoms before Spain decided to fund his trip.

Guns, Germs, and Steel: The Fates of Human Societies

The influence of culture was discussed, but hardly religion or genetics.

Guns, Germs, and Steel PDF Summary

The only other significant addition to our ancestors' cultural repertoire that can be documented with confidence around that time was the use of fire. He mentions the tropical diseases mainly that limited European penetration into Africa as an exception. The author is a retired physician who is hopelessly lost in another time and place.
