**Surprise in a sweep net: my first thread**

Posterior to the original description, Maldonado-Capriles 1960 and Wygodzinsky 1966 provided additional data about the species, including details on the male and female genitalia, extending the geographical distribution to Peru. A sweep net is similar to a butterfly net but more strongly built so that it can be used to sweep back and forth through vegetation. Checklist of species Harpactorinae Coranus trabeatus Dicotelus prolixus Gminatus australis Nylliusrasperatus Nylliustraleticus Peiratinae Peirates fuliginosus Tegeinae Stenopodainae Pygolampis frenchi Ectrichodiinae Tribelocephalinae Holoptilinae Aradelloides maculatus Ptilocnemus femoralis Ptilocnemus lemur Ptilocnemus sidnicus Smiliopus quadrinotatus Emesinae Empicornis rubromaculatus Leistarches serripes Plioaria obscura Stenolemus edwardsi Pseudobargylia iuncea Pseudobargylia addititia Pseudobargylia waratah While most hemiptera are sap suckers, assassin

Male terminalia: seventh tergite apically pointed, surpassing apex of pygophore by 1. Rev Brasil Biol 16: 327—334.

#### Surprise in a sweep net: my first thread

Anterior angles sub-prominent, bluntlytriangular and dark brown. Several morphological characters that define Emesinae as a group are found on the proleg, such as the anterior opening of the acetabula, the elongation of the procoxa, and the lateral campaniform sensilla on the protibia.

#### Ghilianella beckeri sp. nov. of Emesinae from Brazil (Hemiptera, Reduviidae)

Similarly, a clade containing Stenopodainae, Triatominae, and the reduviine genera Zelurus Burmeister and Opisthacidius was consistently recovered with high support P 99, ML 94.

bugs are predators that, like spiders, inject fluids to break down food for sucking through, in this case, a straw-like stylus.

#### Emesinae

Genitalia was mounted in Polyvinyl Lacto-Phenol PVLP with lignin pink dye, and photographed using Axiocam ER65S attached to a Zeiss microscope. Proteinase K digestion for dry specimens see was extended to 48 hrs. As for Mexican amber, Hurd et al.

#### Ctydinna
