### Management of Shared Groundwater Resources: The Israeli

At some point it became obvious that this information needs to be augmented, structured and made available as an overview to everyone interested in groundwater.

## DESIGNING THE LEGAL STRUCTURES OF WATER MANAGEMENT NEEDED TO FULFILL THE ISRAELI

Therefore, IGRAC has published ". This means that Gazans will be spending 5 percent of their GNP to satisfy their domestic water needs. This book explores the options and means for averting this all too realistic scenario by managing these shared groundwater resources.

### Management of Shared Groundwater Resources

The outlet of this basin is toward the Dead Sea in the south. From this analysis, IWRM is seen not as a single approach but as a wide range of approaches to manage water and related resources — a meta-approach or meta-concept that both transcends and links the various levels at which management takes place. Negotiations over allocations and water rights should be conducted with an eye on justice rather than might, and independent arbitration may be necessary.

### Editorial for the Special Issue on the International Shared Aquifer Resources Assessment and Management

To this end, the three agreements signed between Israel and her neighbors, Egypt, Jordan and the Palestinians, are analyzed. This finding suggests that there is a latent contradiction between political and environmental considerations in negotiating such agreements.
