People

You cover so much of the multi-media landscape! Physiology, on the other hand, deals with the internal mechanisms and the processes that work towards sustaining life.

Human Body

The average adult has somewhere between 30 — 40 trillion cells, and an estimated 242 billion new cells are produced every day.

What Scientists Mean When They Say 'Race' Is Not Genetic

But what is it about ultraviolet light that melanin protects against? Every four hours, guess who might be sending you an email. I think most gay men are aware of some degree of femininity in themselves, yet there is no reversal of gender identity. Even to this day, scientists are newly discovering organs that were previously overlooked or have been mistakenly identified as other existing tissues.
