## KEY STAGE 3

This is a mastery light curriculum outlined by AQA. This includes during live lesson sessions as well as independent learning opportunities that our teaching team share with both the students and their parents.

### Science Experiments for Kids

Modelled on the richness of the best international approach to education, our school unlocks potential, nurtures talent and realises dreams, so that students exceed expectations. Raid the recycle bin to see what you can find and go from there.

## KEY STAGE 3

Make a DIY slingshot, cardboard circuits or even cardboard sculptures! NB Year 7s will only be working on the first and second topics within each theme.

### Year 8 Science Worksheets

The CGP house style of engaging diagrams and terrible jokes, keeping sub-topics within a page or two makes this book an excellent teaching and revision resource.
