Lipids and Secondary Plant Products

Saponins form complexes with sterols and interfere with their uptake. Most alkaloids are synthesized only in plant shoots.

Nitrogen Containing Secondary Plant Products

Neonicotinoid use has been linked in a range of studies to adverse ecological effects, including honey-bee colony collapse disorder CCD and loss of birds due to a reduction in insect populations; the findings used to be conflicting and thus controversial, but recent studies by the EFSA have confirmed the risk to bees. The neonicotinoid family includes acetamiprid, clothianidin, imidacloprid, nitenpyram, nithiazine, thiadiazole and thiamethoxam. Bitter principles from family Asteraceae.

Nitrogen Containing Secondary Plant Products

Angiosperms: fats concentrated in endosperm or cotyledon of seeds.

**Secondary Plant Products:
Antinutritional and Beneficial Actions
in Animal Feeding**

Most of the compounds or groups of compounds included in Volume 8 are of restricted distribution within the plant kingdom and wherever possible we have provided information concerning their chemistry, biochemistry, taxonomic significance and probable ecological roles.
Miscellaneous simple Phenolics and Related Compounds: 1.

Nitrogen Containing Secondary Plant Products

Heart failure occurs because of hypertension or atherosclerosis b.
Carotenoids have antioxidative effects and prevent cancer.
