Despite this circumstantial evidence, there is still no direct proof that Copernicus did plagiarize the work of Nasir al-Din al-Tusi, and if he did that he did so intentionally. In Thomas Hockey; et al.

Before you continue to YouTube

There is no evidence that any of the direct work of Nasir al-Din al-Tusi ever made it to Copernicus, however there is evidence that the mathematics and theories did make the journey to Europe. Some consider Tusi one of the greatest scientists of medieval Islam, since he is often considered the creator of a mathematical discipline in its own right.
