Biology:Greater white

When the surviving adult birds returned from wintering at sea in April 2011, to prospect for breeding, conservationists were expectant.

Africa

Identification tips, habits and voice descriptions are given at the back of the book away from the plates. It is being repeated across Europe as a whole, from Spain to Finland, with 27 out of 37 European-African migratory species for which there is reliable long-term population data — 72 per cent of the total — undergoing declines. This worrying prospect is outlined in the first full statistical account put together by experts seeking to understand what is happening and why.

Eurasian insectivores and tree shrews : status survey and conservation action plan

Because of this density of species, the region is thought to be the hotspot in the world most likely to suffer the greatest plant and vertebrate extinction.

Biology:Greater white

However there are no maps.

Africa

A minimum of 60 fixes were found to be sufficient for home range estimation.
