For adults, healthy relationships also boost well-being by providing practical advice and emotional support, which strengthen the hope and confidence needed to weather stressful situations. By later childhood and adolescence, with the benefits of growth-promoting experiences and support, our brains are ready to build on these foundational skills to navigate more complex situations—resisting peer pressure, setting long-term goals and plans, and dealing productively with setbacks. Beyond Behavior Management: The Six Life Skills Children Need, 2nd ed.

## Promoting Young Children's Social and Emotional Health

When Emily finishes her drawing, Ms. For example, promote frequent contact between children in out-of-home care and their parents and siblings, minimize changes of placement for children in out-of-home care, and facilitate the involvement of parents who are incarcerated or facing uncertain residential status. Research indicates that children who are mentally healthy tend to be happier, show greater motivation to learn, have a more positive attitude toward school, more eagerly participate in class activities, and demonstrate higher academic performance than less mentally healthy peers Hyson 2004; Kostelnik et al.

## Enhancing Early Emotional Development : Guiding Parents of Young Children by Judith Brennan Nebrig and Jean Wixson Gowen (2001, Trade Paperback) for sale online

Group care settings provide many opportunities for children to practice their impulse-control skills. In learning to recognize, label, manage, and communicate their emotions and to perceive and attempt to understand the emotions of others, children build skills that connect them with family, peers, teachers, and the community. You built a truck with dozens of Legos.

### **Three Early Childhood Development Principles to Improve Child Outcomes**

Both teachers implement several noninvasive strategies—including modeling—that their center administrators created to support teachers in promoting socially and emotionally healthy behaviors. Social Cognition and the Acquisition of Self.
