Chemistry of selenium and tellurium with tetrachelate and macrocyclic ligands

The nuclearity is greatly influenced by the nature of the chalcogen atom S, Se, Te and by the number of carbon atoms separating the nitrogen and chalcogen centres. Thermodynamically stabilized chiral chalcogen oxides: optical resolution and stereochemistry. Paramagnetism is associated with some of the palladium and platinum products.

The Chemistry of Selenium and Tellurium

Selenium enzymes are involved in the small reducing molecules and.
