This removes the need for having to use a standard clip tuner again. Hours of time will be spent messing around with the settings and the creative juices are sure to flow as you experiment with your guitar! This is one of those gadgets that any tech-savvy guitarist would salivate over. The device has customizable string tension for players to adjust the tension levels that fit their comfort level.

6 Cool Guitar Gadgets : Ask.Audio

Instead of carrying around a heavy, big, and clunky guitar stand, all you need is this little guitar dock. This contraption can be used on all types of guitars like acoustic, classical, electronic, and even ukuleles. Guitar Tricks offers a free trial to get access to 24 lessons to test the program.

Musical Entropy

A little something for everyone. The eBow has an octave switch that can raise your notes by an octave higher. The SpiderCapo or partial Capo is a neat little device that can Capo individual strings.
