The World the Railways Made

West of Chicago, many cities grew up as rail centers, with repair shops and a base of technically literate workers.

BBC Two

This clip is from the series Locomotion: Dan Snow's History of Railways. They are not much in advance in the past. The railways enable these potential gains to be materialised.

Economic changes from railways

Electric Locomotives Get a Slow Start The first prototype for an electric locomotive was built in 1837 by Scottish chemist Robert Davidson, powered by galvanic battery cells. The GTP began construction in 1906 and was completed in 1914 through the Yellowhead Pass and along the spectacular valley to , BC.

China

Elliott, 1869; developed further by O. The Railroads of the South, 1865—1900: A Study in Finance and Control

China

The first true railway built in Canada was the from La Prairie on the to St. The federal government charged UP with violating the Sherman Act, and in 1913 the ordered UP to divest itself of all SP stock. VIA is responsible for most intercity passenger operations.
