The introduction of an actor separate from the chorus was an improvement not yet made in the drama. Aristophanes brought out the under the names of Philonides and Callistratus Schol. Hogy a közönség figyelme el ne ernyedjen s a darabnak kellő hatása legyen, szünetekre volt szükség; e miatt a költő darabját bizonyos számú actusra osztott fel.

**De officiis (LT)**

Respecting them, the reader is referred to the article The mimes differed from the comedies in little more than the predominance of the mimic representation over the dialogue, which was only interspersed in various parts of the representation. Но если она и достигла у мегарян некоторой степени развития, по всей вероятности, не далеко ушла там от характера импровизированных шуток и фарсов.
