## Palaeoecology and rising seas

The Species-area Relationship and the Montebello Islands The results suggest that loss of coastal plain area had the greatest impact on the non-volant mammal species from the Montebello Islands in the past, causing both changes in abundances and local extinctions.

Unpublished PhD Thesis, University of Western Australia, Perth, Western Australia, Australia. Quaternary Science Reviews 29, 539e553. The coralligenous build-ups occur in the lower part of an unconformity-bounded, transgressive-regressive sequence.

## Can dung beetles from the palaeoecological and archaeological record indicate herd concentration and the identity of herbivores?

The dead do not lie: using skeletal remains for rapid assessment of historical small-mammal community baselines.

## Read Download Quaternary Palaeoecology PDF

This is a closely-sampled deposit from the outer ditch at Banbury Castle dating to 1640e1778 AD Smith and Smith, 2009 unpublished data.
