Sending Your Kid to Camp With Diabetes

I couldn't raise money for publicity anymore. Day-to-day diabetes management requires the entire family, from checking blood sugar, counting carbohydrates, dosing insulin and adjusting for physical activity.

Playing Sports and Other Activities

Practice your spel with your friends and colleagues in planning the camp. Making airplanes -- we use balsa wood, and have kids freehand drawings on the wood, and then someone, usually an adult, will cut out the drawing with a utility knife and we'll hot glue the plane together.

Youth Physical Activity Guidelines

If you can't, look around, and either ask a friend or ask another person who looks like they know what they're doing. However, the reversal that occurred during the follow-up period did not produce a return to the initial mean values recorded at week 0.

Youth Physical Activity Guidelines

Beginning in the summer of 2002, the Association started alerting its member camps to the availability of diabetes-care guidelines that were developed in partnership with the American Diabetes Association.
