## Binding Assays

To improve DT, drug-specific proteins were coupled to magnetic beads to deplete drug in the sample.

## The Immunoassay Handbook

Solar-Energy-Driven Photoelectrochemical Biosensing Using TiO<sub>2</sub> Nanowires.

## Receptor

Photoelectrochemical bioanalysis: the state of the art.

## Ligand binding assay

Recommendations for the validation of immunoassays used for detection of host antibodies against biotechnology products.

## Receptor

Washing filters with a buffer removes residual unbound and any other ligands present that are capable of being washed away from the binding sites. This gives the affinity of the tagged molecule for its partner.

## Ligand Binding

System moves AP to dispenser and runs dispense protocol to add blocking reagent. Journal of Macromolecular Science, Part A 2014, 51 5 , 385-393.
