Bill Text

Early contact, social support, and mother-infant bonding. Nonetheless, magnesium sulfate is presumed to be safe in women who are breastfeeding. **Breastfeeding and child cognitive development: New evidence from a large randomized trial.**

Guidelines and Resources for Hospitals

These materials tell patients about how hospitals can help them when they are first learning to feed their baby.

NZBA: Resource

J Hum Lact 2010;26(2):157-67.

USBC : Toolkit: Implementing TJC Perinatal Care Core Measure on Exclusive Breast Milk Feeding

Protecting, promoting and supporting breastfeeding: the special role of maternity services. Any mother who attempts breastfeeding should walk away feeling that she has accomplished at least one goal. There are no study data that evaluate the direct effects of magnesium sulfate on the success of lactation.

Breastfeeding

Randomized trial of silver nitrate, erythromycin, and no eye prophylaxis for the prevention of conjunctivitis among newborns not at risk for gonococcal ophthalmia. As some or all of these steps are increasingly being promoted as standard of care by government agencies eg, the Centers for Disease Control and Prevention and by The Joint Commission, it is important to be certain that the basis for the recommendations has been documented in reproducible scientific studies and that the benefits of the practices recommended outweigh the risks.

NZBA: Resource

Recent cuts in health visitor numbers and breastfeeding peer support services mean many women may be left without the support they need

however they choose to feed their infants. So collaboration to improve employment conditions for nursing mothers can have a positive impact for sure.
