Talk:De nostri temporis studiorum ratione

Vico was a man centuries ahead of his time whose genius was sadly not recognized by the majority of his contemporaries. For a concise and informative account of Vico's influence, see the translators' Introduction to *The Autobiography of Giambattista Vico*, translated by Max Harold Fisch and Thomas Goddard Bergin. This is the path to the *verum-factum*, which is a form of comprehension achieved through truths held in the human mind as opposed to *verum-certum*, or certainties achieved through the Cartesian approach of unpacking what is true through empirical observation.

He reminded us that we ignore the lessons of the ancients at our peril — Vico eschewed reductionist thinking for the Greek and Roman traditions — and encouraged us to rely on rhetoric as a tool which we might use to comprehend the social and natural sciences.

Returning to Vico: The Role of the Individual in the Investigation of the Social Sciences*

The role of the individual and the importance of individual investigation are thus central to what is a priori truth. This seems like a reasonable middle ground between the dogmatic conceptual approach of the positivists and the hyper-contextual empirical subjectivism of the realists.

De nostri temporis studiorum ratione

Vico recognized this as a pattern across societies: that as individual minds form, a series of similar fundamental priorities for civil life takes shape. Similarly, to arrange a political speech according to the precepts of geometrical method is equivalent to stripping it of any acute remarks and to uttering nothing but pedestrian lines of argument. For over 40 years, Philosophy and Rhetoric has published some of the most influential articles on relations between philosophy and rhetoric.
