### **Evidence-based health care: an open learning resource for health care practitioners. Second edition, Health Information & Libraries Journal**

The CCIC, through financial support provided by the Canadian Institutes of Health Research awarded via competitive grant competitions, has developed an open-access, online platform to provide up-to-date science and research around cannabis and cannabinoids directly from the scientific and medical community to the public. Information for Health Care Professionals: Cannabis marihuana, marijuana and the Cannabinoids: This document is a very comprehensive review of the endocannabinoid system, how cannabinoids work and the evidence regarding health benefits and risks associated with cannabis and cannabinoids.

#### **careLearning**

The questionnaires were administered to all attendees of one-day EBP workshops. The advisers' breadth of practical experience and wisdom are reflected in the content.

#### **Knowledge and beliefs concerning evidence**

MSDH included the EBPH model in grant applications to the Coordinated Chronic Disease Program and the Community Transformation Grants program, both initiated by the Centers for Disease Control and Prevention. Barriers such as lack of funding, skilled personnel, incentives, and time, along with limited buy-in from leadership and elected officials, impede the practice of EBPH 8-12. Prev Chronic Dis 2005;2 2.

#### **Knowledge and beliefs concerning evidence**

It will also help inform the design and delivery of our public education and awareness activities. The guide to community preventive services: what works to promote health? The first team expanded to address obesity prevention and prioritized strategies in April 2012.
