Somalia: Overcoming multiple discrimination against minority women

An examination of cancer risk beliefs among adults from Toronto's Somali, Chinese, Russian and Spanish-speaking communities. Muslim breast cancer survivor spirituality: coping strategy or health seeking behavior hindrance? I will then attempt to Somaliland for workquestions: and resident in Camden. Ashamed, she begged the officer to cover her.

Overcoming Barriers to Healthcare for Immigrant Women in...

I used to fear that if I went there when I was not sick, the disease would be planted in me. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean lobortis lectus quis eros gravida porttitor.

Women's Economic Empowerment and Overcoming the Barriers

This indicates there may also be great potential to tailor faith-based messages for men, or to create general messages about cancer for both genders.

General 6 — SCWCA

Johnson CE, Ali SA, Shipp MP. Also, not just about ourselves, we need to help each other and support those who have the disease. Many participants shared that they knew what cancer was, but in their view it was something that was almost always described as serious or deadly.

Somalia: Overcoming multiple discrimination against minority women

Funding Research reported in this publication was supported in part by the National Cancer Institute of the National Institutes of Health under the Minnesota Community Networks Center for Eliminating Cancer Disparities U54CA153603.

From 'There' to 'Here': An investigation of the initial settlement experiences of Ethiopian and Somali refugees in Toronto on JSTOR

They face social exclusion and multiple forms of disadvantage including high unemployment, underemployment, and overcrowding, as well as frustrations and despair that sometimes result in suicidal behaviours, particularly among the young males. Views of Somali women and men on the use of faith-based messages promoting breast and cervical cancer screening for Somali women: a focus-group study. Faith can play an important role as an asset to promote breast and cervical cancer screening, and there may be substantial benefits to adding faith-based messaging to other interventions that focus on improving screening uptake.
