

# Proceedings of the first Symposium on Integrated Control of Hypsipyla.

IICA-CTEI - U.T.Dallas Computer Science Program

Description: -

- Agricultural pests -- Integrated control -- Congresses.  
Borers (Insects) -- Tropics -- Congresses.  
Hypsipyla grandella -- Congresses. Proceedings of the first Symposium on Integrated Control of Hypsipyla.  
- Proceedings of the first Symposium on Integrated Control of Hypsipyla.

Notes: Includes bibliographical references.

This edition was published in 1973

Filesize: 31.47 MB

Stein , MIT AI Lab Memo No.

**mahogany shoot borer**

Participants of an international workshop on Hypsipyla shoot borers in 1996 concluded that the most promising management strategies of these pests involved identification and use of resistant genotypes and planting mahogany and cedro trees in mixed stands under an established canopy. In Proceedings of the American Control Conference ACC , 2009. In Proceedings of the Workshop on the Evaluation of Software Defect Detection Tools, June 2005.

**Publications**

In fact, the most important damage of the insect, destruction of the terminal shoot, is the result of a single larva per tree. The relative susceptibility to H. Education programs should also assist professionals in preparing and obtaining their ASPRS certification and professional certification credits.

**EENY336/IN613: Mahogany Shoot Borer, Hypsipyla grandella (Zeller) (Insecta: Lepidoptera: Pyralidae: Phycitinae)**

Recent advances, such as sum of squares relaxations for polynomial nonnegativity, have made it possible to numerically search for Lyapunov functions, to estimate regions of attraction, and to certify measures of performance; however, these procedures are applicable only to problems of modest size. Master's thesis, Massachusetts Institute of Technology, September 2018. IEEE-RAS International Conference on Humanoid Robots, 2016.

## **Chung**

Proceedings of the International Conference on Object-Oriented Programming, Systems, Languages, and Applications, pages 397-410, October 2010. Pushbroom stereo for high-speed navigation in cluttered environments. He suggested, however, that chemical control of these pests might be applicable to nursery situations.

## **mahogany shoot borer**

The insect's most severe damage to trees occurs when a larva bores into and kills the terminal shoot. In Proceedings of the ACM Symposium on Principles of Programming Languages, pages 81-95, January 2000.
