## Data and statistics on Environmental migration

I anticipate further delays in conducting the Census if the virus ever enters the country. Despite these advances, the present work suffers from many of the same limitations as its precursors.

## Older persons and migration

Innovative sources: sources are timely and provide real-time data; they also have broad coverage and are automatically collected.

## Older persons and migration

The formulae and calculations are visible to the end-user, and the spreadsheets can be modified by users if they do not exactly match the data available.

## Migration data in Europe

However, it tends to work better if the time point is associated with a memorable event, such as the previous census, on the assumption that the coverage of that previous census was largely complete so that people remember being counted.
