Refereed Publications

The Uniqueness type system and lazy graph copying are important techniques to efficiently implement functional languages.

Parallelization in Inference Systems : International Workshop, Dagstuhl Castle, Germany, December 17

Proceedings 26th International Symposium Implementation and Application of Functional Languages, IFL '14, Boston, U. Of course, we could implement the schedule ABABB more efficiently than simply using five procedure calls; for example, we could generate inline code for the schedule 2AB B ; this would have 3 blocks of code; two for B , and one for A. Fernandez Decision Based Adaptive Model for Managing Software Development Projects 475 M.

Refereed Publications

The producer iterates from 1 to 4 using an iterator x. Karoly Bosa and Wolfgang Schreiner. In Workshop on Generative Technologies, Budapest, Hungary, april 5 2008.
