

Problems in aerial application - II. Effects of chlorinated hydrocarbons on substrate-linked phosphorylation

Civil Aeromedical Research Institute - Problems in aerial application (1963 edition)

Description: -

Phosphorylation. Problems in aerial application - II. Effects of chlorinated hydrocarbons on substrate-linked phosphorylation

Report (Civil Aeromedical Research Institute (U.S.)) -- 63-4.
[CARI report] -- 63-4. Problems in aerial application - II. Effects of chlorinated hydrocarbons on substrate-linked phosphorylation

Notes: Also issued online.

This edition was published in 1963

Filesize: 64.47 MB

Planting certain types of seed are also included in aerial application. In a search for an explanation of an earlier finding that dieldrin decreased the rate of methionine uptake by cardiac muscle, chickens and rats were exposed to this compound and the substrate-linked phosphorylation phenomenon was studied during the anaerobic degradation of glucose. Many countries have severely limited aerial application of pesticides and other products because of environmental and public health hazards like spray drift.
