In this strand, papers should reflect on, present research or field experience in the domain of Community-Based Learning. When teaching these new-age students, it becomes important for teachers to be flexible and find new ways to improve their teaching quality.

### **Effective Teaching and Learning in Higher Education**

Today, we live and function in a digital era where students are constantly exposed to the latest trends in technology and media. Community-Based Learning builds stronger and more relevant academic skills and provides a context for learning in terms of what students are as citizens, and how they are able to contribute to the needs of society. Teachers should, therefore, look at ways to facilitate independent, critical, and creative thinking by using active learning techniques.
