**Association of radiologic findings with mortality of patients infected with 2019 novel coronavirus in Wuhan, China**

For some owners, issues arise that make going on walks less enjoyable. CT findings of NCIP were featured by predominant ground glass opacities mixed with consolidations, mainly peripheral or combined peripheral and central distributions, bilateral and lower lung zones being mostly involved. He returned from a short-term sabbatical in New York, with a renewed focus on producing high quality films.

### **Wei**

We retrospective studied 27 consecutive patients who were confirmed NCIP, the clinical characteristics and CT image findings were collected, and the association of radiologic findings with mortality of patients was evaluated.
