important means by which children evaluate their skills, knowledge, and personal qualities, but it may cause them to feel that they do not measure up well against others. These are some of the developmental outcomes that denote social and emotional competence. That is quite a departure from the earlier days of playing with the people in your group just because they are there.

Within the home, parental marital difficulty or divorce affects more than half the children growing up today in the United States. Each of these examples of the growth of social and emotional competence illustrates not only the interaction of social, biological, and representational influences, but also how their development unfolds over an extended period.

### Personality development in an expanding social world

As children mature biologically, temperamental characteristics emerge and change over time. The parent who has to take on more work may also be less available to the children.
