### Home hygiene and environmental sanitation: a country situation analysis for India

Audit by Food Authority confirms general compliance with documented system. ADVERTISEMENTS: For the same reason, the down calver cows about to calve should also be nearer. Despite these facts, the study found something extraordinary — the Amish had fewer cavities and a lower rate of gum disease compared to the general American population.

Coupled with longstanding aversion to hospitals, and the Amish might have a problem. More conservative Amish boil some water on a wood-burning stove and fill their bathtubs with it, with the children going first and the father going last with a freshly-filled tub. There is a reluctance to acknowledge the home as a setting of equal importance along with the public institutions in the chain of disease transmission in the community.
