All participants had normal or corrected-to- normal vision. All by La Prairie Photography Lina Tesch.

## Exploring the Use of Sensorial LTP/LTD

Painter and sculptor Giulio Paolini, a master of the conceptual avant-garde, has repeatedly emphasized his intimate relationship with art history.

## Hans Op de Beeck ARTBOOK

This performance modulation was hemifield-specific exp. Irrelevant head orientation changes were also displayed to distract attention, requiring selective face processing identity change detection to correctly perform the task. Experiment 1: Bilateral stimulation In the first experiment, in order to maximize potential effects of stimulation on visual performance, we administered bilateral stimulation and assessed the effect on face processing performance immediately after stimulation.

**9789061537113**

Katrin Thormann wears an embroidered silk dress by FENDI Treat yourself by going out habillée de luxe but with a clean face, where only the light slipping through the features de nes the contours. . Errors in this condition were used to monitor the effects of LTP- vs LTD-like stimulation.
