**Coronavirus and the economy: How**

This makes it one of the biggest determinants of economic health. For the 1960-81 period, the explanatory power of M1 is about 10 percent greater than that of the debt measure in its relationship to GNP growth. Intermediaries in markets for insurance, debt, and equity are studied too.

### Money and Economic Activity

Brazil already lost due to the Zika virus and will most likely lose more before the end of 2016. In the credit creation phase, demand for goods, services, and investment assets and the production of them is strong, and in the debt paying back phase it is weak.

### Money and Economic Activity

Without these and the Fed's other emergency measures, the economy would have crashed already, experts say.

### A note on debt and economic activity

This discourages businesses from expanding and consumers from taking on debt. Investors frequently look at charts to understand technical indicators in the market. That is what happened in 2008 and has happened for most of the time since until just recently.
