Naturalists are also committed to the idea that consciousness is reducible to the physical. Once the act of consciousness is expressed in psychological language, the objects and states-of-affairs can be described in a way that shows the intentional structure of consciousness at the psychological level of analysis.

## Husserl

The certainty of the doubting and the doubter is, therefore, self-evident. The key to intersubjectivity is empathy, which enables us to ascribe intentionality to others.

**Paul Ricœur, Husserl: An Analysis of His Phenomenology**

However, what is it that thing that doubts, wills, desires, and apprehends, in short, thinks? In the light of our apparent fallibility and the fact that we know meditatively that is, indirectly—through our five senses as empiricists, for example, aver and not immediately directly—a seeming impossibility, or at least difficulty, as our analysis above has thrown up—can we honestly think we can know or do we announce to the epistemic optimists that it is high time they closed shop? Though the accent is always on the possibility of understanding the self as an agent responsible for its actions, Ricoeur consistently rejects any claim that the self is immediately transparent to itself or fully master of itself. So words like peer, colleague, etc. Lawhead, Voyage of Discovery, op.

The first stage consists of a lecture manuscript from 1905; the second stage consists of the so-called Bernau manuscripts, research manuscripts that were written in 1917 and 1918; and the final stage consists of the so-called C-manuscripts, research manuscripts that were written in the late 1920s and the early 1930s.

## Broomé: Intentional Analysis in Psychological Research

We recognize that when a person produces an expression, there is always more expressed than even the person was aware at the time Gadamer,

2008; Giorgi, 1985. Interesting as a document, along with Sartre's M-P's, and Levinas's early writings, of what some of the first French readers of Husserl thought was most interesting in his work.

I think this is praise worthy.

**Husserl: An Analysis of His Phenomenology by Paul Ricœur**

This is only possible if my brain can use information from the instants just before as well as information from the primal impression in order to predict where it will go. Edmund Husserl, Cartesian Meditations, translated by Derion Cairns The Hague, Netherlands: Nijhoff Press, 1960 , p. The context of the entire story can be drawn upon by the research in the imaginative variation to unpack these which are explicated elsewhere or implied by the context.
