LYZ2

Three trials demonstrated that grazing lambs were just as effective as herbicides in controlling winter weeds. Subsequently, the TRGC5 cassette formed the TRGCC3 cassette, which in turn duplicated to generate the TRGC4 cassette.

Evolution of the mammalian lysozyme gene family

This is known as the 'taxonomic identifier' or 'taxid'. Other than forage, the other staple feed for sheep is , often during the winter months.

Multiple cDNA sequences and the evolution of bovine stomach lysozyme

Four cDNA clones within the D region exhibited a nucleotide substitution with respect to the germline sequences. These are stable identifiers and should be used to cite UniProtKB entries.

The expansion of the TRB and TRG genes in domestic goats (*Capra hircus*) is characteristic of the ruminant species
