## Computer forensics investigation

These are based on 'dynamic risk factors'; that is those which can be changed. The basic objective of network forensics is the same, which is to collect information about the packets in the network traffic such as the mails, the queries, the browsing of the web content, etc.

## Computer forensics investigation

Electronic monitoring Offenders released under electronic monitoring are no more likely to engage in criminal behaviour when released from prison compared to those who are not eligible for early release.

## Rule 901. Authenticating or Identifying Evidence

If the number is that of a place of business, the mass of authority allows an ensuing conversation if it relates to business reasonably transacted over the telephone, on the theory that the maintenance of the telephone connection is an invitation to do business without further identification.

## What Works to Reduce Reoffending: A Summary of the Evidence

Since the malware program is not running, there is no fear of deleting or changing the files. It should be noted that, given the importance of the US system of supervision to the findings of this study it is uncertain to what extent the findings can be generalized to supervision arrangements in Scotland. Implementation of CBT programmes Differences in results of American and UK studies may reflect variations in the quality and rigour of programme implementation rather than genuine differences in effectiveness.

## Robust link prediction in criminal networks: A case study of the Sicilian Mafia

A qualitative study in Scotland interviewed 20 former gang members about their experiences of police enforced curfews and electronic monitoring. The progress of computer forensics has eased in cross-checking if an electronic record has been tampered with or not.
