This supplemental Chemistry PACE DVD is designed to be used along with the corresponding ACE Chemistry PACE 1132 for Grade 11 sold-separately. De Hevesy also is credited with discovering the technique of neutron activation analysis, in which samples are bombarded by neutrons in a nuclear reactor or from a neutron generator, and the resulting radioactive isotopes are measured, allowing the analysis of the elemental composition of the sample. Experts in nanotechnology, advanced polymer chemistry, molecular biology, and biomedical engineering are investigating ways to deliver the drugs to the correct site without affecting surrounding tissues.

A person who is going for diagnosis or treatment with nuclear medicine should be sure to inform the health professional if they are pregnant or breastfeeding, or if they may be pregnant. However, since the treatment often targets potentially fatal diseases, the benefits tend to outweigh the risks. This additional dose may affect the patient, and side effects are possible.
