

# Investigations of the metabolism of N-alkyl agents with antineoplastic activity.

University of Aston. Department of Pharmacy - DFT investigation on the metabolic mechanisms of theophylline by cytochrome P450 monooxygenase

Description: -

-Investigations of the metabolism of N-alkyl agents with antineoplastic activity.

-Investigations of the metabolism of N-alkyl agents with antineoplastic activity.

Notes: Thesis (Ph.D.) - University of Aston in Birmingham 1982.

This edition was published in 1982

Filesize: 61.101 MB
