Geology of the Himalaya

Many millions of people now visit the Himalayan region in a typical year.

Himalayan Ranges: Shiwaliks, Middle Himalayas, Greater Himalayas, Trans

It was September of 2019 and I was travelling with my wife and two sons in the Indian province of Ladakh, deep in the Himalaya.

Glacial Landforms in Relation to the Himalayas

Tectonic forces affect topography by causing elevation or depression. It is a strike valley and extends from the foot of the Dhaola Dhar Range to the south of Beas. For example, all of the world's major rivers have their headwaters in mountains, and more than half of humanity relies on the fresh water that accumulates.

Glacial Landforms in Relation to the Himalayas

Kunlun The Kunlun Mountains are one of the longest mountain chains in Asia, extending across western China and the Tibetan Plateau. After keeping soil, water, and nutrients in position, they must contend. Hydraulic action is the shear wave hitting the coastline and its backwash pulling materials back into the ocean.

Surface Processes During Flash Floods in the Glaciated Terrain of Kedarnath, Garhwal Himalaya and Their Role in the Modification of Landforms

Active moraines however, are largely devoid of plant cover. Then we turned a corner and saw a man in a black coat lying under a car, changing a flat tire.

What are Landforms?

They are separated from the main block by Ganga and Brahmaputra rivers. It's positioned to the north and west of the Taklamakan Desert near

the border region of Kazakhstan, Kyrgyzstan and western China. In their place is a more intricate pattern of crops and animal husbandry that reflects adaptation to vertically compressed environments.

Geography: Different Landforms in India and feature of earth's surface

The Himalayan system includes over 100 mountains exceeding 7,200 m 23,600 ft. Other erosion landforms occur through partial erosion, when softer materials eventually disappear and only the hardest rock is left behind. Corrasion is when weaker layers of materials disintegrate or dissolve into the ocean.
