Research Training and Career Development

Rivera-Rentas before preparing an application. The legislation had been passed with the efforts of Senator , who was responsible for helping the majority of the NIH institutes get their start, wealthy New York entrepreneur , and founder , who had retinitis pigmentosa.

Types of Research Training and Career Development Funding Opportunities

In general, increases in the NIH budget during the 1970s and 1980s often did not exceed inflation. Advances in understanding the nervous system are beginning to pay off in the form of treatments for previously intractable problems such as spinal cord injury, acute stroke, multiple sclerosis, epilepsy, and Parkinson's disease, to name a few.

NINDS Division of Extramural Activities

However, until 1961, the NINDB and NIMH shared research facilities and scientists, often collaborating on projects. Lasker was prompted to address the disease when , father of then-President John F. This search feature obtains best-matches with the terms you choose, and shows an overall score based on the scientific rankings.

The Office of Extramural Programs (OEP)

The institute was now able to fund its research. National Institute of Neurological Disorders and Stroke. NINDS has established two major branches for research: an extramural branch that funds studies outside the NIH, and an intramural branch that funds research inside the NIH.

About the Extramural Research and Training Division

NIOSH funding opportunities are also posted on , which is the single access point for over 1,000 grant programs offered by 26 Federal grant-making agencies.

About the Extramural Research and Training Division

October 28, 1988—Public Law 100-553 changed the name of NINCDS to the National Institute of Neurological Disorders and Stroke. A Clinical Neuroscience Branch was established within the Division of Intramural Research.
