Being human : human

Looking at the example of watching a soccer game on a mobile TV appliance, users would value higher that they could see the goal and would not care so much about not seeing the game. In contrary to common belief users studies showed that users are very tolerant regarding this aspect.

Being Human: Human

. The question persists and indeed grows whether the computer will make it easier or harder for human beings to know who they really are, to identify their real problems, to respond more fully to beauty, to place adequate value on life, and to make their world safer than it now is.

May trend to be technical in some section, though, there is an appendix and all the matters are related to the use of cases. My prediction would be not that users will just have thousands of computers per person, but that all of these will be talking to each other as well.

BBC NEWS

Case Study 3 deals with the topic of how to design technology that can enhance human memory. One special concern to be addressed was that the compression algorithms used to deliver mobile TV would make small objects invisible.

Being Human: Human Computer interaction in 2020

In turn computers will be able to anticipate what we want from them, which will require new rules about our relationship with machines. The interface - designed at Microsoft's research labs in Cambridge - allows people to see where other members of their family are at any given time. Now the virtual world of thousands of computers per person is realized, just ask any torrent user.

BBC NEWS

It will take you wherever you wish, but it will not replace you as the driver. Dubbed Big Board, the display, which is free to use, allows users to download information to their mobile phones about a range of topics including politics, health and even university lectures.

BL4: Being Human

As computers will be everywhere in the year 2020 there will be countless new opportunities on the one hand and many many new threats on the other hand.

BBC NEWS

Sydney Smith It's how you deal with failure that determines how you achieve success. The question is, how can interface design address those social and moral issues? Classical user-centred design and research comprised of study, design, build and evaluate the new technology. Human-Computer interaction is indeed going to change Microsoft argues, going from the Mobility Era with multiple computers per user into the Ubiquity era with thousands of computers per user.
