PPT

As a result of the need to control some serious insect pests as well as disease organisms, individuals who grow peaches in their backyard for home use often discover that obtaining acceptable quality fruit requires more specialized care than they can give.

Disease Management

The gentlest organic spray would be Insecticidal Soap; the one we find works best is the Multipurpose Insect Killer. No doubt whiteflies can be a persistent and annoying pest.

RESTORING AND ENHANCING BIODIVERSITY IN AGROECOSYSTEMS TO IMPROVE PEST REGULATION AND SUSTAINABLE PRODUCTION

We assessed the effectiveness of non-crop vegetation e.

WHITEFLY LIFE CYCLE Both species develop from eggs and grow through a series of instars. Biological Control Most native and some exotic scale insect pests are attacked by a number of parasitoid wasps, which often keeps them below damaging levels Ehler 1995, Dale and Frank 2014; Meineke et al. Masses of gum mixed with frass a gritty, sawdust-like insect excrement are the primary symptoms of attack.
