It also seeps into the soil around roots. Inside them are air sacs lined with continually moist epithelial tissue.

Biology (1987 edition)

Corms, unlike bulbs, do not have layers of scales. Humus also affects plant growth because it releases nutrients, and its negatively charged organic acids can trap the positively charged mineral ions in soil water. When ships arrived in 1589 to resupply the colony, they discovered that the island had been abandoned.
